

Product Offerings

This is a general list of products and services available via UNS, LLC:

Critical Power Solutions	Power Distributions Systems
Desktop and Peripheral Back Up Systems	Single/Dual Input Power Management
Network and Server UPS (Rack/Tower)	Voltage Regulation Products
Data Center and Facility 3 Phase UPS	Busway Power Distribution Systems
6kVA-1000kVA Single/Multi-Module Configurations	Static/Transfer Switches

Racks and Enclosures	IT Cooling Solutions
Low and High Density Enclosures	Rack Containment Systems
Vendor Neutral Enclosures	In-Row High Density Cooling Solutions
Wall Mount Enclosures/Seismic Enclosures	Hot-Aisle Containment Systems
Wire Management	Up-flow/Down-flow Climate Control Systems

IT Environmental Control Products	HVAC Services
Pelco Security Systems	Engineered Design-Build Solutions
IT Asset Control Products	MEP Analysis
Building Access Control Products	Energy Efficiency Strategies
Critical Facility Management Tools	Sustainable Technologies

Switchgear	Step-Down Transformers
Bypass-Isolation Standard/Manual Transfer Switches	Harmonic Cancellation and Phase Shifting Transformers
Control/Power Fuses	Linear/Non-Linear Energy Efficient Transformers
LV, MV & HV Integrated Switchgear Solutions	Autotransformers
Automatic Transfer Switches	Dry Type Transformers

On-Site Power Generation	Facilities Management Software
LP Generator Sets	UPS Management Software
Diesel Generator Sets	Generator Management Software
Rental/On-Demand Generator Sets	Critical Facility Security Management
Complete Power Plant Solutions	Building Management Software (Power, HVAC, Plumbing)

Project Management Services	Site Services/Energy Profiles
CAD Modeling (Design/Analysis Phase)	Critical Facility Energy Profiles
Computational Fluid Dynamics (CFD)	Critical Facility Commissioning
Power/Cooling ROI Studies	Power/Cooling Audits
Infrastructure Commissioning Services	Project Management/Mentor Services
Containerized Solutions	Construction Services
Modular Data Center Systems	IT Facility Remodel Services
Scalable Data Center Systems	Re-location Services
High-Density Infrastructure Solutions	New Construction
Pre-engineered Solutions	Data Center Consolidation Services
Data Center Design Services	Preventative Maintenance
Physical Engineering Services	Single/3 Phase Power
Complete Power/Cooling Design Solutions	Cooling Systems
3D Modeling of Data Center Space	Monthly/Quarterly/Semi-Annual Service Packages
Virtualization Action Plans/Maintenance Action Plans	Parts/Service On-Site 24 x 7 Support via Manufacturer
De-installation/De-manufacturing	Recycling
Decommissioned Equipment Removal Service	Battery Disposal Services
IT Re-sell Services	Trade-UPS Program
Certificates-of-Destruction	IT Reinvestment Compensation
Precious Metal Harvesting	Cable Harvesting

About Us:

Universal Networking Services, LLC (UNS)

Universal Networking Services, LLC is based in Denver, Colorado with regional offices in Houston, Texas and Lafayette, Indiana. Specializing in critical power and cooling infrastructure for wiring closets, server rooms and data centers, UNS has differentiated itself from the typical vendor of IT infrastructure. We are a true solutions provider. Your network should meet current needs, yet be adaptable for future growth of the network without replacement of core infrastructure. Our strategic partnership with APC and Schneider Electric brings solutions to a wide array of challenges facing modern IT networks. Efficient use of IT resources is mandatory in today's market. The current data center must be easily deployable, highly adaptable and most importantly reliable. Modern data centers are often the backbone of today's businesses and failure of the network can cause disastrous consequences. The network must be available 24-hours a day, 365 days a year. We pride ourselves on right-sizing of equipment to reduce electrical waste and ensure that the total-cost-of-ownership (TCO) is kept as low as possible.
